New Zealand Journal of Mathematics

Report to the NZMS Annual General Meeting, 2021

This is the first full year that the editorial management system at

https://nzjmath.org/

is running. While there have been some minor issues with the new management system, it is a notable improvement on the previous email-based system. In addition electronic copies back to the first issue of the predecessor journal, the Mathematical Chronicle, are available through the University of Auckland Library at

http://www.thebookshelf.auckland.ac.nz/document.php?wid=2436

and

http://www.thebookshelf.auckland.ac.nz/document.php?wid=2081 .

The current volume, 51, is being loaded at the moment, thanks to the efforts of Chris Wong. It has 7 papers already published and a further 4 are in the copyediting stage with a combined page count around 104 pages.

This year we published a special volume to the memorial of Sir Vaughan Jones and with Guest Editors Marston Conder, Rod Downey, David Gauld and Gaven Martin. At the moment it has already 21 papers, with a total length of 726 pages. The very first paper is the famous paper 'Planar algebras' by Vaughan Jones which has been on arXiv at https://arxiv.org/abs/math/9909027 since 1999, with the original aim to be published in the NZJM. Special thanks are due to David Gauld for taking care of the copyediting/publishing stage for this special volume.

The papers in the Journal now have a DOI-number. It is the aim to obtain a DOI-number also for all the old papers. Moreover, the Journal is now a member of the Free Journal Network (FJN) https://freejournals.org .

The membership of the Editorial Board is: Charles Semple (chair), Marston Conder, Shaun Cooper, Rod Downey, Tom ter Elst, Steven Galbraith, Rod Gover, Mark Holmes, Astrid an Huef, Vivien Kirk, Richard Laugesen, Gaven Martin, Robert McLachlan, Warren Moors, Eamonn O'Brien, James Sneyd, Winston Sweatman and Mark Wilson.

The NZJM Committee currently consists of Winston Sweatman of Massey University (Albany) and Mark Wilson of the University of Massachusetts Amherst representing the NZMS, Jianbei An and I representing the University of Auckland Mathematics Department and Charles Semple of University of Canterbury as Editor is ex officio a member.

Thanks are due to the University of Auckland Mathematics Department and the NZMS for financial assistance. Thanks are also due to the Editor, Charles Semple and his Editorial Board.

Tom ter Elst
Chair of the NZJM Committee   November 2021
